### WORKING WITH SCHOOLS

Introducing and inspiring children and young people to the value of art and craft activities is something Patchings actively pursues. Our team of tutors regularly provide creative workshops in a variety of medium to many schools across the region. These sessions can be linked to key stages and curriculum subjects. Inset days are also popular with schools as our tutors work with teachers to offer ideas and exercises for art and craftwork in the classroom. Further details are available from Pat Wood.

### ART SCHOOL PROGRAMME

Published each year is our programme of courses and workshops for adults in a variety of medium for all levels of ability. This also includes details of our popular Children's Activity Courses during school holidays for those aged 8 and above. New for 2008 is our Saturday Club for children aged 5 to 7 years.

### ABOUT PATCHINGS.

On 6th August 2008 Patchings will be 20 years old. The privately owned family business began in 1988 with the restoration of a series of redundant farm buildings and a small plot of land for a car park. These now house two galleries, the Barn restaurant, art material shop and reception. Development of the Centre was in most cases unplanned, as neighbouring properties and land unexpectedly became available. But like many such opportunities they only come once. The Pavilion and grounds were opened by the Duke of Gloucester in 1991; the cottage development of Garden Rooms, the log cabin and farmhouse studios and framing centre opened in subsequent years. Patchings continues to work towards its original aims of promoting the enjoyment and participation in art and will hopefully provide our visitors with creative inspiration and enjoyable experiences.
